SMIC 10th Anniversary

We have known Simon and Richard since the time they were with TT Club. After they have formed SMIC in 2003, we continue working with them as close partners.

SMIC is not only an insurance broker in the typical sense, procuring insurance and handling claims, but also provides various value added services, including claims prevention, claims statistics, drafting and giving advice on transport related documents and contracts, giving advice and assistance on claims with legal implications, arranging marine insurance coverage, organizing seminars, issuing monthly newsletter etc. The claims team in SMIC is top in the field and the services provided are always of the highest standard.

We are grateful to SMIC for the excellent services and friendship in the past 10 years and we have benefited a lot from their expertise advice and support on transport claims and loss prevention.

We are happy that SMIC has developed so rapidly and has built up such a good name and strong market share in the insurance brokerage business. We are sure that SMIC will be even more successful in the years to come.

Alfred Lo

Chief Financial Officer
